

Dear Valued Customer

November 10, 2020

This is important information about a planned electric service interruption in your area to allow a contractor to remove a dead tree from power lines on Jefferson Street.

Please share this information with your family.

A contractor for the Town of Delaware City needs to remove a dead tree in your area. In order for the tree contractor to perform that work safely and avoid the risk of injury, Delmarva Power will need to interrupt electric service to your location for several hours on November 19, 2020, weather permitting.

Here are the details:

This work is currently scheduled for THURSDAY NOVEMBER 19, 2020.

- **Crews will arrive in the morning to prepare and we expect to interrupt electric service at approximately 9 A.M. for about 7 hours, barring any complications.**
- **Once the contractor acquires the minimum approach distance to the power lines, they will contact Delmarva Power to restore service and the contractor will continue work to remove the rest of the tree.**
- **Please make appropriate notifications to your security alarm representatives that the power may be off to complete our work.**
- **Please keep access to your refrigerator and freezer at a minimum during this time**

We appreciate your patience as this tree is safely removed these power lines to avoid any future possibility of service interruptions. As with all of our projects, safety will be our highest priority.

Thank you,

Vince Jacono, Jr.
Public Affairs, Delmarva Power
